This image shows a full page of blank graph paper. The grid consists of small squares formed by thin gray lines. There are approximately 20 columns and 25 rows of squares. A thicker vertical line runs down the right side of the page, about one-fifth of the way from the edge, creating a margin. A thicker horizontal line runs across the middle of the page, dividing it into two equal halves. These thicker lines intersect at the center of the grid. The overall appearance is that of a standard sheet of graph paper used for mathematics or science.

This image shows a full page of blank graph paper. The grid consists of small squares formed by thin gray lines. There are approximately 20 columns and 25 rows of squares. A thicker vertical line runs down the right side of the page, about one-fifth of the way from the edge, creating a margin. A thicker horizontal line runs across the middle of the page, dividing it into two equal halves. These thicker lines intersect at the center of the grid. The overall appearance is that of a standard sheet of graph paper used for mathematics or engineering.

This image shows a full page of blank graph paper. The grid consists of small squares formed by thin black lines. There are approximately 20 columns and 25 rows of squares. A thicker vertical line runs down the left side, about one-fifth of the way from the edge, creating a margin. Another thicker vertical line runs down the right side, about one-fifth of the way from the right edge. These two lines divide the page into three sections: a narrow left margin, a large central area, and a narrow right margin. The paper is otherwise completely blank, with no text or other markings.
