

This image shows a full page of blank graph paper. The grid consists of small squares formed by thin gray lines. There are approximately 20 columns and 25 rows of squares. A thicker vertical line runs down the left side, about one-fifth of the way from the edge, creating a margin. Another thicker vertical line runs down the right side, about one-fifth of the way from the edge. These two lines divide the page into three vertical sections: a narrow left margin, a wide central area, and a narrow right margin. Additionally, there are horizontal lines that are slightly thicker than the others, spaced evenly across the page at regular intervals.
